MaineCat Options - Screen Scrape

My current opinions:

Local catalogs: must have 583, display encouraged but optional (and contingent on catalog)

Central System: screen scrape or API from OCLC until III can handle 583 (if ever).

(quick poll of catalogers was 2 to 1 against using 856 in non standard way)

Local III Catalog options:

- Configure webpub.def to display 583
  - Ugly display
- Configure webpub.def to display 583 and use javascript to clean up display
  - yet another 'hack' that might break in upgrades, etc.
- Use item 856 - only field that will transfer to Innreach, but a rather non standard use.

Shared Print Symbol

Ongoing issue with ILL fees - currently exploring using BOTH symbols, with Shared Print symbol being a non supplier until resolved:
